Rishi Jha

DATA ANALYST

Objective

Detail-oriented and analytical, Computer Science student with strong foundational knowledge in statistics, data visualization, and SQL. Seeking an entry-level Data Analyst position to apply my-skills in data cleaning, analysis and reporting to drive data-driven decision making, Eager to contribute to a dynamic team and grow

Skills

- Python programming language
- SQL, Power BI,numpy,pandas,matplotlib
- Excel, EDA
- Data Cleaning and Preprocessing

Contact

Project

COVID-19 GLOBAL ANALYSIS

Dataset: World Health Organization dataset

Capable to: Track daily cases, recoveries, death rates by country or continent, and present insights visually.

Used: Python and Tableau

TITANIC SURVIVAL SYSTEM

Dataset: Titanic survival dataset from kaggel

Used: EDA, python pandas, matplotlib, Seaborn library. **Capable to:** Understand and visualize the survival rates of Passenger on the basis of their gender, passenger class, age, Family onboard and embarkation port.

CREDIT CARD FRAUD DETECTION

Dataset: credit card fraud detection dataset from kaggel

Capable to: Find anomalies and patterns in fraudulent transactions.

Used: EDA python, NLP, numpy, pandas

Education

ST. ANSLEM NORTH CITY SCHOOL

Class 12th : 88.4%
C.B.S.E

ST. ANSLEM NORTH CITY SCHOOL

Class 10th : 88.2% C.B.S.E

VELLORE INSTITUTE OF BHOPAL UNIVERSIT

CGPA: 8.3(current)
